

Logical tags

This is a simple paragraph. It contains some less important text, **important text**, *reference text*.
In the new line we also have alternative for underline,~~alternative for strike~~.

Now here we have
The definiton of *HTML*, is used for structure of webpage and *HTML* full form.

Physical and some more tags

Here we will see some more tags from the next line
~~This is deleted but not semantically~~, underlined text, **bold text**, and *italic text*.

Extra things and more

This is a book, written by *LPU CSE Students*. **very interesting** which contains Water formula: H_2O . Power: x^2 .

I want quotations without quotation marks and also with “quotation marks”.

Submitted By:- Amit Singh Panwar

The screenshot shows a code editor interface with the following details:

- File Menu:** File, Edit, Selection, View, Go, Run, Terminal, Help.
- Search Bar:** A search bar at the top right with the placeholder "code".
- Toolbar:** Standard window control buttons (minimize, maximize, close) are visible in the top right corner.
- Left Sidebar (EXPLORER):** Shows a tree view of files and folders. The "OPEN EDITORS" section is expanded, showing "Task_2.html" is the active editor. Other files listed include "Activity_1 by Amit.pdf", "Basic Structure.html", "Comments and quotes....", "Line_Breaks And Horiz...", "List.html", "Logical style tags.html", "Paragraph.html", "Physical tags.html", "Structure_1.html", "Task_1.html", and "Task_2.html".
- Right Panel (CODE):** The content of the "Task_2.html" file is displayed. The code is as follows:

```
<html>
  <head>
    <title>HTML Task 2</title>
  </head>
  <body>
    <h1>Logical tags</h1>
    <p>This is a simple paragraph. It contains some <small>less</small> important text, <strong>important text</strong>, <i>reference text.</i><br>
    In the new line we also have <u>alternative for underline</u>, <s>alternative for strike</s>. </p>
    <p>Now here we have<br>
    The definiton of <dfn>HTML</dfn>, is used for structure of webpage and <abbr title="Hypertext Markup Language">HTML</abbr> full form.</p>
    <hr>
    <h2>Physical and some more tags</h2>
    <p>Here we will see some more tags from the next line <br>
